

Lars Magnus Visit to Australia

The Australian Red Dairy Breed would like to welcome Magnus to Australia. Magnus, 21, comes from the Torpane herd in Sweden. He has recently gone into partnership with his father to continue breeding Swedish Red Cows at the Torpane Herd. Australian Red enthusiasts know the influence this herd has had here, most famously from Torpane 882, who still has a top ABV in Australia. Torpane 882 is also the grandsire of the current 2nd highest APR bull, ARBBONJOVI.

Magnus is currently travelling through Victoria, and if anyone else would like Magnus to visit their herd email info@aussiereds.com.au for further details.
