

VR Hjusticia gNTM +33

(pronounced as Justica)

(VR Hammer x Vret x Gunnarstorp)

The
number 1
sire

VR Hjusticia remained the number 1 sire in VikingRed with NTM +33. This VR Hammer son was born at Karl-Gustav Karlsson, Sweden. There is a special story behind the name of the bull. The breeder had a long process with authorities to get justice to himself and therefore wanted to name the bull like this.

The dam of VR Hjusticia is a tall cow, 150 cm, with excellent udder and high production of 11,577 kg ECM. The grand dam is still in the herd and has an average production of almost 11,000 kg ECM.

VR Hjusticia is a calving ease sire with very good health and functional traits. He is also on top in feet & legs as well as in udder conformation. He is available sexed in Australia, perfect for maiden heifer matings. Hjusticia is also a great component lifter and positive milk sire who will leave a medium to slightly smaller framed, hard working cow.

VR Fritz gNTM +24

(VR Falcon x S Valpas x Gunnarstorp)

VR Falcon, sire of VR Fritz

Star
pedigree
sire

VR Fritz comes from the agricultural school at Nytorp, Sweden. His ancestor was bought to the herd when the school started in 1946. The dam, 456 Inga, a Valpas cow, has now had two calves and has produced annually 9637kg ECM with very low somatic cell counts for every test.

She has started her second lactation with high production, over 40kg ECM at her first three tests. Her conformation is 83-83-86-85. The MGD had three calves and produced 10270 kg ECM. The GMDG also had three calves and she produced an average of 11,330 kg ECM.

VR Fritz breeds medium framed cows with very nice rumps. He is a very easy bull to use as his feet and legs, udders, production and health traits are all at a high level. Fritz also has a very strong sire stack behind him of top proven sires.

VikingGenetics new sires 2016

We have a very exciting team for all breeds for 2016 to ensure the same quality you have been used to from VikingGenetics. We wish you all a great 2016 and please make full use of our Viking teams services wherever you have your dairy business.

VR Borat gNTM +28

(Brick x Alavire x Turandot)

VR Borat is a real Viking with his health profile being on top in female fertility as well. His udder health is 116, other diseases 115 and hoof health 109. He also breeds excellent longevity.

The dam is a nice first calver classified 82 for feet & legs and 82 for udder and making a high first production year also. Borat will leave a similar framed cow to V Foske and has a well balanced production profile of milk with positive components. Another great all round sire with some different sire lines.

The breeder is Matti Hakala, Finland. Sexed semen available in Australia.

A real Viking

VR Fonseca gNTM +31

(VR Favre x A Linné x R Alfa)

VR Fonseca is the best of many sons of VR Favre that VikingGenetics owns, having gNTM +31 at the moment. VR Fonseca comes out of an A Linné cow whose dam is also the dam of VR Cigar.

The cow was flushed three times and gave several good bulls and heifers of which we can mention the full brother, VR Fontain, out of the same flush and also half sib VR Hilbert, one of the up-to-date sires of sons in the VikingRed breeding scheme. The dam of Fonseca was classified 83-80-88-85 and had especially high components.

VR Fonseca is a great production sire with high components. He gives good functional traits, strong body and very good udder. Fonseca will be perfect for those looking for the larger framed Red cow. He comes from Søren Røndbjerg, Denmark.

Great production sire

VR Capri gNTM +28

(VR Cigar x Hällom x Ooppium)

VR Capri, born 2013, is a VR Cigar son out of a Hällom dam. He was not very high ranking at the time when Cigar sons were on podium but he has smoothly been climbing up and ranks no. 1 at the moment. His dam was a high component cow having protein-% 3.8.

Maternal grand-dam is an Ooppium daughter still in milk having more than 60,000 kg lifetime yield. Capri's strengths are production, longevity and fast milking speed. Capri will breed medium framed cows with

wider pins, superb fore udder attachment and front teat placement. He was born at Harri and Leena Liukkonen, Finland.

Production, longevity and milking speed
